

# Interface to R+V commercial credit insurance

Automated handling of processes with R+V commercial credit insurance.

# Integrated electronic interface to R+V commercial credit insurance

These days, commercial credit insurance companies offer comprehensive insurance protection. In Germany around 42,000 companies use such credit insurance contracts as part of their credit management; they have become an everyday protection instrument. If the „worst case" occurs and the customer fails to pay, the insurance covers the loss.

## COMMERCIAL CREDIT INSURANCE IN CAM

With an extensive customer base considerable costs may be incurred for the processing of the contracts if there is no software support, not least because obligations to the insurer need to be fulfilled.

The electronic interface to R+V commercial credit insurance in CAM Industry & Trade supports you in designing slimmer operative workflows and automating many processes or part-processes.

You thus protect your credit management staff from missing notifications and drastically reduce the effort required to create the relevant reports.

Integrate R+V commercial credit insurance seamlessly into your credit management with CAM Industry & Trade and so reduce workload, time and costs.

## Overview of the functions of R+V commercial credit insurance in CAM

### **FUNCTIONS R+V NEW CUSTOMER AREA**

CAM identifies the allocation of the customer above or below the discretionary credit limit.

#### **Above the discretionary credit limit**

- ✓ Customers above the discretionary credit limit are named along with the desired limit when requesting credit insurance
- ✓ Automatic processing of the responses from the insurance company (acceptance, part agreement or rejection)
- ✓ Where appropriate, CAM determines an internal limit in addition to the credit insurance limit
- ✓ CAM identifies other necessary activities

#### **Below the discretionary credit limit**

- ✓ CAM carries out the initial checks automatically through an information agency
- ✓ CAM determines the internal limit for the flat-rate range

### **FUNCTIONS R+V EXISTING CUSTOMER AREA**

- ✓ CAM recognizes when a customer moves above the discretionary credit limit and initiates the necessary measures automatically
- ✓ CAM monitors the exceeding of the limit and makes the necessary applications for limit increases
- ✓ CAM makes it possible to add a further temporary limit
- ✓ CAM identifies excessive credit insurance limits and limit cancellations
- ✓ CAM processes limit reductions or cancellations made by the credit insurance company
- ✓ CAM processes notifications of change of address or new company form
- ✓ CAM processes signals indicating improvements to negative payment records in a structured manner
